Does the pipeline recover planted connectivity?
Simulated signals on real montages; points below the line: attenuation by noise
Alpha phase connectivity (ciPLV)
Measured = true
Frontal-frontal pairs (planted)
All other pairs (nothing planted)
Measured ciPLV change, word on - word off
(with noise; mean ± SEM over sessions)

0.30
0.35
True ciPLV change, word on - word off
(planted signal alone, no noise)
High-gamma envelope connectivity (AEC-c)
Measured = true
Frontal-frontal pairs (planted)
All other pairs (nothing planted)
Measured AEC-c change, word on - word off
(with noise; mean ± SEM over sessions)
